

Diagram illustrating a game tree structure for a 6-player game. The root node is labeled "ROOT -2 5 4 3 -6 1". The tree branches out into several levels of nodes, each representing a player's turn. Nodes are labeled with sequences of numbers representing the game state. Blue text indicates the action taken by the player whose turn it is to move. The tree ends in terminal nodes labeled with sequences of numbers representing the final game state.
