

The diagram consists of several rows of tree-like structures. Each row contains multiple trees, each associated with a label. Some labels include a code (e.g., 15-4-4-3-2) and others include a name (e.g., NDEP 123-4-6-5). Blue numbers are placed at specific nodes within the trees, indicating values or weights. The trees vary in complexity, from simple linear chains to more intricate branching structures. The overall layout suggests a systematic classification or enumeration of these mathematical objects.
