

Diagram illustrating the construction of a 3D drawing from a 2D drawing, showing the relationship between the two drawings and the resulting 3D structure.

The diagram is organized into four rows, each representing a different stage of the construction process. The top row shows the initial 2D drawing (left) and the resulting 3D drawing (right). The subsequent rows show the construction of the 3D drawing from the 2D drawing, with the 3D drawing being built up from the 2D drawing.

The 2D drawing is a graph with nodes and edges. The nodes are labeled with numbers 1 through 6, and the edges are labeled with numbers 1 through 6. The 3D drawing is a graph with nodes and edges, where the nodes are labeled with numbers 1 through 6, and the edges are labeled with numbers 1 through 6. The 3D drawing is built up from the 2D drawing by adding edges and nodes.

The diagram shows the construction of a 3D drawing from a 2D drawing, with the 3D drawing being built up from the 2D drawing. The 2D drawing is a graph with nodes and edges, and the 3D drawing is a graph with nodes and edges. The 3D drawing is built up from the 2D drawing by adding edges and nodes.
