

The diagram illustrates a hierarchical classification system, likely a phylogenetic tree or a taxonomic hierarchy. It features a central node at the top, which branches out into several main groups. Each group is further subdivided into smaller units, represented by vertical lines and diagonal branches. The labels, such as 80DP16-2-413, 75DP16-2-143, and 70DP16-2-143, identify specific nodes or taxa within the hierarchy. The branching pattern suggests evolutionary relationships or taxonomic divisions. Some branches are highlighted in blue, while others are in grey, possibly indicating different levels of significance or classification.
