

Diagram illustrating a sequence of operations (DRAW, DUP, SWAP, etc.) and their corresponding stack states. The root node is labeled "ROOT -2 1 -6 -5 4 3". The tree branches out into several levels, with each node containing a sequence of numbers representing the stack state. The operations are labeled in blue text next to the branches. The final state at the bottom is "3DRAW 4 5 6 -2 -1 -6 -5 4 3".
