

Diagram illustrating a game tree structure for a 5-player game. The root node is labeled "ROOT -1 6 -4 -5 -2 3". The tree branches out into several levels of nodes, each representing a game state. The nodes are labeled with coordinates (e.g., -1 4 -6 -5 -2 3, -1 6 -4 -5 2 3, -1 6 -4 -3 -2 5, etc.). The tree structure shows the progression of the game, with nodes branching out from the root and further down. The diagram illustrates the game's structure and the winning strategy for player 5.
