

The diagram illustrates a sequence of operations (DRAW, DUP) and their effects on a stack. The root node is labeled "ROOT 3 -2 -1 6 -5 4". It branches into several nodes, each representing a state after an operation. Blue labels like "3,-2", "6,-5", etc., indicate the operation performed. The final row shows states after multiple DRAW operations, such as "11DRAW 5 6 12" and "12DRAW -3 -2 -1 6 5 4".
