

The diagram shows a hierarchical tree structure starting from a root node at the top, labeled "2-1 4 5 -6 -3". This root branches into four children. Each child further branches, creating a dense network of nodes and edges. Nodes are labeled with sequences of numbers, some with hyphens, representing different states or configurations. Edges connecting the nodes are labeled with pairs of numbers in blue, indicating transitions between states. The overall structure suggests a search space exploration or a state transition graph.
